PROFESSIONAL EXPERIENCE

Oldbaum Services

Senior Data Scientist

Stirling, UK

Jan 2025 - Present

- Oversee company-wide software development and client consultation after transitioning to leadership role.
- Designed Oldbaum's client-facing software platform to streamline and optimise external communication.
- Gained expert-level understanding of scanning lidar system control for complex scanning strategies across all OEMs.
- Active member of IEA Task 43 - setting the standard for global digitisation of wind energy data.

Data Scientist

Jun 2023 - Jan 2025

- Lead developer overseeing optimisation of Oldbaum's software ecosystem, focusing on speed and accuracy.
- Streamlined Oldbaum scanning lidar reconstruction pipeline providing bankable data for 10+ measurement campaigns.
- Designed Oldbaum cloud data storage platform for sharing high volumes of sensitive lidar and metocean data with clients.
- Vaisala L2 scanning lidar trained - installed 15+ scanning lidars in UK, Japan, South Korea and the Philippines.
- Provided analysis and Stage 2 certifications for 10+ floating lidar systems - clients incl. EOLOS, Blue Aspirations, Webons.
- Provided original research and analysis leading to peer-reviewed papers in scanning and floating lidar systems.

Trespas

Data Analyst

Glasgow, UK

Jan 2023 - Jun 2023

- Sole data analyst reporting directly to the Executive Directors at a global retail brand (£100M+ annual turnover).
- Led analytics and forecasting strategy to inform high-level decisions for international expansion into Canada and Poland.
- Automated daily reporting via Python pipelines, enabling accurate weekend reporting for the first time in company history.

ASOS.com

NLP Research Intern

London, UK

Jan 2022 - Sep 2022

- Collaborated with a team of machine learning (ML) researchers to enhance ASOS's customer recommendation systems.
- Designed transformer-based LLMs on live customer data, outperforming internal benchmarks on key engagement KPIs.
- Contributed to the full ML lifecycle, gaining hands-on experience with MLOps workflows for deployment at scale.

University College London

ML PhD Researcher

London, UK

Oct 2021 - Nov 2022

- Conducted original research in Monte-Carlo modelling on large high-dimensional Astrophysical datasets.
- Deployed cutting-edge scalable ML pipelines on remote HPC clusters with GPU acceleration.
- Developed software best-practices by maintaining research group's public open-source repositories (60+ GitHub stars).
- Published peer-reviewed research and presented at top-tier international ML and Astrophysics conferences.

EDUCATION

MSci Physics with Astrophysics (1st Class), University of Glasgow

Sep 2016 - Jun 2021

- Awards:** Masters Thesis Prize (2021), Undergraduate Astronomy Prize (2018), Best Astronomy Lab Student (2017).
- Scholarships:** RISE Germany (2020), Carnegie Trust (2020), Royal Astronomical Society (2019).

PUBLICATIONS

- A. Oldroyd, M. Young, **M. M. Docherty**, et al. "Comparison of classical and drone based hard-target methodologies applied to scanning lidar for offshore wind." (2024).
- M. A. Price, M. Mars, **M. M. Docherty**, et al. "Fast emulation of anisotropies induced in the CMB by cosmic strings." (2023).
- A. S. Mancini, **M. M. Docherty**, M. A. Price, and J. D. McEwen. "Bayesian model comparison for simulation-based inference." (2023).
